PROFILE

Software Developer with hands-on experience in API integration, data workflows, and cloud-based automation. Skilled in Python, SQL, and RESTful services, with experience handling JSON/XML data and building scalable backend solutions. Passionate about integration systems, business intelligence, and AI-driven automation. Currently expanding knowledge in enterprise integration platforms and ERP systems. Exploring practical applications of AI to enhance business automation and data-driven decision-making.

TECHNICAL SKILLS

- Programming: Python, Java, C#, JavaScript (React.js), Swift
- Frameworks & Backend: Django, ASP.NET Core, Frappe Framework, REST APIs, Web Services
- Frontend Technologies: HTML5, CSS3, Bootstrap, DOM Manipulation, Responsive Design
- Databases: MySQL, SQL Server, SQL (data extraction, validation, reporting)
- Cloud & DevOps: Amazon Web Services (EC2, S3), CI/CD pipelines using GitHub Actions
- Tools & Methodologies: GitHub, GitLab, Visual Studio Code, Jira, Agile (Scrum)
- Integration & Testing: RESTful API integration, JSON/XML data transformation, system integration workflows, end-to-end testing, troubleshooting, SQL-based validation
- Operating Systems: Linux, Windows

WORK EXPERIENCE

Backend Developer (Remote) | Millennium Tiles (International)

Jan 2026 - Present

- Managed business server using Frappe Framework and ERPNext to support enterprise workflows and operational processes
- Maintained production deployments and backup processes for servers to support system reliability and operational continuity
- Built custom modules, DocTypes, scripts, and backend features to enhance system functionality and automate business processes
- Developed and maintained full-stack features using Python, JavaScript, and Frappe framework architecture
- Collaborated remotely with cross-functional teams to troubleshoot issues, implement enhancements, and support deployed applications.
- Implemented CI/CD pipelines using GitHub Actions to automate build and deployment workflows
- Supported cloud-based deployments on Amazon Web Services EC2 and S3 environments, including deployment troubleshooting and basic monitoring

Full-Stack Developer | Holiday Explorers

Jul 2025 - Dec 2025

- Developed responsive and interactive web applications using HTML5, CSS3, JavaScript, and React
- Translated UI/UX designs into accessible and user-friendly interfaces following WCAG standards
- Developed backend services using Django and contributed to API components built with C# and ASP.NET Core
- Designed and implemented RESTful API integrations, handling structured data exchange using JSON and XML
- Wrote and optimized SQL queries to support efficient data retrieval and application performance
- Collaborated in Agile Scrum environments, participating in testing, UAT support, defect tracking, and feature validation

- Built reusable and modular UI components using React.js
- Developed responsive web pages using HTML5, CSS3, and media queries
- Integrated APIs and processed JSON data for real-time updates
- Ensured cross-browser compatibility and performance optimization

EDUCATION & QUALIFICATIONS

University Of South Australia - Bachelor`s Degree (Software development & Data Analytics)	2025
Madhav International School - Year 12	2022
